

General

Flower food

- The solution for the most used flower in bouquets.
- Suitable for every rose variety.
- Supplies roses with all necessary nutrients for the full development.
- Increases vase life up to 60% compared to water alone.
- Available in sticks for 1 litre of solution.

Effects

- Enhances performance in relation to bud opening, colours and size of blooms.
- Maintains a good leaf quality and prevents "bent-neck".
- Vase life guarantee of over 7 days possible.
- Lowers the pH of the water.
- Mixes easily, clearly and without odour in water.

Applications

- Suitable for all types of tap water.
- No need to change the water or to re-cut stems during the period in the vase.
- Also suitable for mixed bouquets with roses.

Savings

- Reduces flower wastage.
- Reduces the number of possible consumer claims.
- Added quality value at low cost per stem.

Recommendations

- Store under cool and dark conditions, preferably between 5°C and 25°C.
- Shelf life: 18 months when stored under the right conditions.
- The pH of the ready to use solution is 3.5 5.5 depending on the alkalinity of the water.
- Dosage: 1 stick per litre of water.
- Do not use in unprotected metal vases (zinc, copper, iron) or (antique) crystal vases.
- If necessary top up vase with water containing Chrysal Clear cut flower food.
- Residual solutions may be drained into the sewer system.
