

Product sheet – Chrysal Aqua Pad

General

- Chrysal Aqua Pad is a hemp-fibre mat to be placed between the plant's grower pot and cover pot, gift bag or ceramic pot.
- Creates a water reservoir, perfect for plants susceptible to dehydration issues, such as Azalea, Cyclamen, Rosa, Hydrangea and Campanula.
- Absorbs and releases water easily; absorbs up to 10 times its own weight.
- 100% compostable.
- 9cm square pad suitable for 13cm pot.
- Easy to use.

Effects

- Increases sales; improved shelf presentation by healthy and fresh looking plants.
- May increase shelf life by up to 25%.
- Reduces plant waste in the total supply chain.
- Plants need watering less frequently at the retail stage or by the consumer.
- No surplus water which prevents effect of excessive watering (root rot).
- The extra water reservoir can also be used to facilitate a longer logistic chain or for product to be produced in advance.

Benefits / return on investment

- Plant waste reduction.
- Reduces handling costs.
- Improves sales and margin.
- Home compostable.

Applications

- To be used by plant growers, packers and retailers.
- To be used during transport and/or at retail level.

Recommendations

- Store under dry conditions.
- Chrysal Aqua Pad has an unlimited shelf life if stored under the right conditions.
- Used pads can be discarded with other compostable waste.

Conditioning

Instructions for use:

1. Place a Chrysal Aqua Pad in a cover pot or gift bag.
2. Add 85 ml of water to the Chrysal Aqua Pad.
3. Place a plant (in the grower pot) on top of the wetted Chrysal Aqua Pad.
