

Product sheet – Chrysal CVBN automatic dosing

Drop 'n Go!

Chrysal presents the automatic dosing device for the Chrysal CVBN tablets. This user friendly little machine, designed and manufactured by our partner BTM Glasshouse Logistics, offers effective dosing of the chlorine tablets in an automated flower processing environment.

Benefits

- No manual contact with the chlorine tablets.
- Easy to use.
- Saves time and labour costs.
- Low maintenance.

Technical information

- Opportunities for integration in existing flower lines or delivered as a standalone device.
- Has an empty alarm through light and sound.
- Simply functioning on the regular electricity network.
- Contains the option of flexible dosing, i.e. multiple tablets per bucket.

Chrysal CVBN

Chrysal CVBN chlorine tablets are available in multiple sales units of 800 tablets and 3200 tablets. Please ask your local sales representative about availability in your country.

For more information about availability of the machine and integration in your production process, please feel free to contact Chrysal International or your local sales representative.
