

# **Product sheet – Chrysal Professional 2**

#### General

- Clear mixing conditioner allowing presentation of bouquets in glass vases during the sales phase, whilst also keeping the flowers in optimum condition.
- Highly suitable for the florist channel.
- Can be used for all cut flowers, with the exception of Anthurium.
- Suitable for use in cold storage, transport and retail phase.
- Contains the correct amount of nutrients for the natural development of the flower, without stimulating a full development during this phase.
- Available in 1 L bottle, 5 L, 10 L and 25 L jerry cans.

- Mixes clear and without odour in water.
- Stimulates water uptake, thus preventing 'bent-neck'.
- Lowers the pH of the water.
- Keeps flowers and foliage in optimum condition.
- Better colour retention of the flowers.
- Leaves and stems remain firm and green, no slimy stems.

#### **Applications**

- Suitable for all types of tap water.
- Can be dosed automatically.
- Dosage control possible with the use of a glucometer.

## **Savings**

- Reduces water consumption and saves time as solution can be re-used.
- Reduces flower wastage by up to 50% versus water alone.
- Extends distribution and sales period.
- Reduces the number of possible consumer claims.

### Recommendations

- Store under cool and dark conditions, preferably between 5°C and 25°C.
- Shelf life: 18 months in sealed packaging and stored under the right conditions.
- PH of the ready to use solution: 3.5 5.5 depending on the alkalinity of the water.
- Dosage: 5 ml per litre of water.
- The maximum treatment time is 5 days. Depending on the conditions, the solution is also reusable for up to a maximum of 5 days.
- Do not mix residual solutions with freshly made ones.
- Do not use in unprotected metal buckets or vases (zinc, copper, iron).
- Residual solutions may be drained into the sewer system.
