

Product sheet – Chrysal Professional 2

General

- Conditioner for all cut flowers, with the exception of Anthurium.
- Suitable for use in cold storage, transport and retail phases.
- Contains the ideal balance of nutrients for the natural development of the flower, without stimulating full development during this phase.
- The carton and empty inner liner are simple to separate and also easy to dispose of.
- Available in 1 litre bottle, 10 litre and 20 litre Bag in Box format, 5 litre and 25 litre jerry cans and 100 litre, 200 litre and 1000 litre drums.

Effects

- Keeps flowers beautiful up to 50% longer compared to water alone.
- Stimulates water uptake, thus preventing 'bent-neck'.
- Lowers the pH of the water.
- Keeps flowers and foliage in optimum condition.
- Better colour retention of the flowers.
- Leaves and stems remain firm and green.
- Mixes clear and without odour in water.

Applications

- Suitable for all types of tap water.
- Can be dosed automatically.
- Dosage control possible with the use of a glucometer.

Savings

- Reduces flower wastage by up to 50% versus water alone.
- Extends distribution and sales period.
- Reduces water consumption and labour cost, as the solution can be re-used.
- Reduces the number of possible consumer claims.
- Bag in Box: Less packaging waste as the HDPE inner liner contains up to 70% less plastic than the equivalent sized jerry can.

Recommendations

- Store under cool and dark conditions, preferably between 5°C and 25°C.
- Shelf life: 18 months in sealed packaging and stored under the right conditions.
- The pH of the ready to use solution is 3.5-5.5 depending on the alkalinity of the water.
- Dosage: 5 ml per litre of water.
- The maximum treatment time is 5 days. Depending on the conditions, the solution is also re-usable for up to a maximum of 5 days. Keep the flowers as cool as possible.
- Do not mix residual solutions with freshly made ones.
- Do not use in unprotected metal buckets or vases (zinc, copper, iron).
- Residual solutions may be drained into the sewer system.
- Bag in Box: The empty inner liner can easily be separated from the outer carton. The cleaned inner liner and the outer carton can be disposed of following local recycling guidelines.
