

Product sheet – Largo

General

- Post-harvest product for cut flowers including Alstroemeria, Aster, Atractia, Brassica, Crocosmia, Curcuma, Eryngium, Euphorbia fulgens, Helleborus and Lilium.
- Available in sachets of easy to dissolve granules.
- Largo is registered in the Netherlands, Germany, France, Denmark and Sweden.

Effects

- Maintains leaf quality by suppressing leaf yellowing.
- Prolongs vase life of flowers.

Applications

- Suitable for all types of water.
- Should be dosed manually.
- To be used by the grower and in supply to auctions.

Benefits

- Reduces flower wastage.
- Prolonged distribution and sales period possible.

Recommendations

- Store under dry, cool and dark conditions, preferably between 5°C and 25°C.
- Shelf life: 36 months when stored under the right conditions.
- The pH of the ready to use solution: 7-8.
- Dosage: 1 sachet per 100 litres of water (0.02g/l)
- Treatment time: 4-72 hours.
- Solution can be re-used for a maximum of 2 days. Use the solution immediately after preparation.
- Do not mix residual solutions with freshly made ones.
- Residual solutions may be drained into the sewer system.

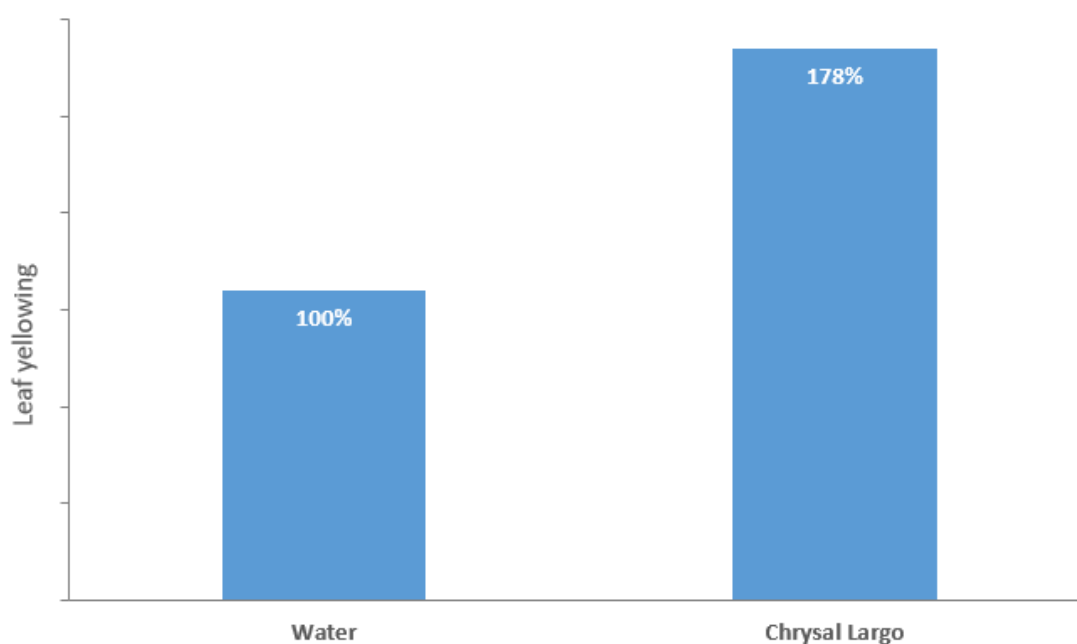

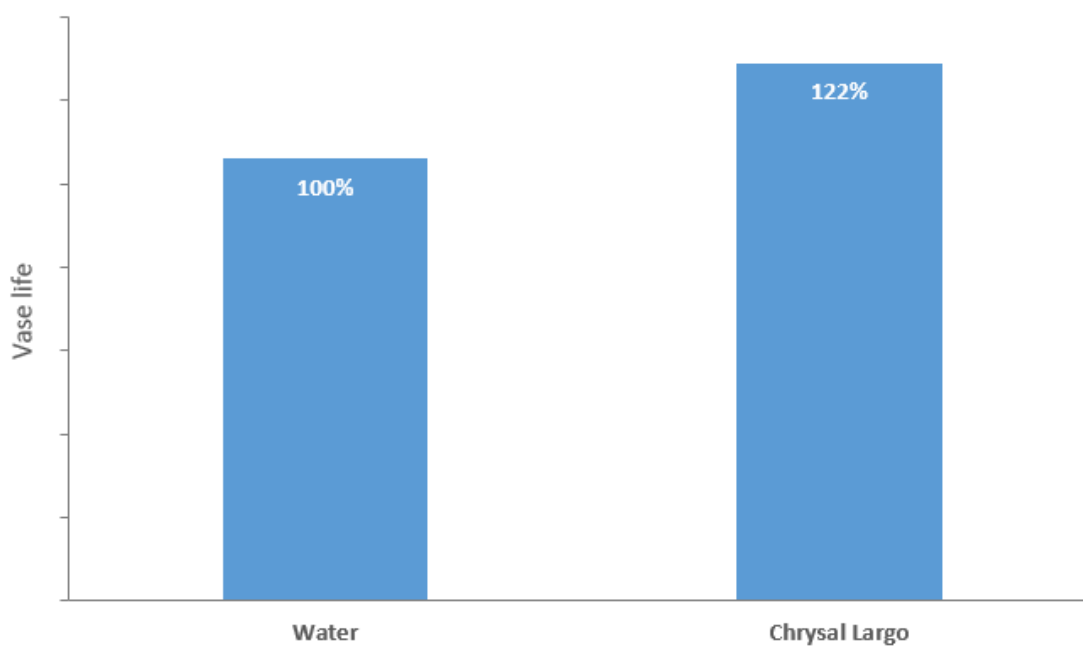

Test results

The results of 18 trials on different cut flowers are averaged and shown in the table, graphs and photographs below.

Table 1: Overview of test results on a variety of cut flowers with Largo compared to a control.

Parameter	Number of trials	Water	Largo
Flower vase life	18	100%	122%
Leaf yellowing	8	100%	178%
