

# Vacancy

With a legacy that spans back many decades, Chrysal is a main driving force in the flower and plant industry and worldwide market leader in flower food. Whether you grow, transport, sell, or simply enjoy the beauty of flowers in your own home, Chrysal has a tailor-made solution to keep cut flowers and potted plants looking fresher for longer. We aim to match the business needs of our partners with the enjoyment of the consumer: optimal floral and plant performance, better and sustainable business, and in the end, a more beautiful world. **Chrysal. Nurturing beauty.**

For our head office located in Naarden we are looking to hire an experienced and passionate

## GLOBAL REGULATORY MANAGER

to further develop our success as the specialist of full care solutions for cut flowers and potted plants.

### What are your tasks and responsibilities?

- Managing and executing the activities of Regulatory Affairs worldwide, especially in the field of Plant Protection Products and Biocides;
- Creating, coordinating and supporting the compilation of registration dossiers based on the applicable laws and regulations;
- Evaluating existing data, identifying and filling in data gaps, reviewing toxicological studies, making proposals for additional research, classification and labeling;
- Preparing risk assessments and expert statements;
- Supervising and maintaining registration dossiers globally;
- Keeping track of product registrations in various countries;
- Establishing and maintaining a close relationship with relevant registration agencies, research institutes and authorities;
- Staying up-to-date with changes in international regulatory legislation and guidelines and ensuring that Chrysal products are in compliance;
- Developing regulatory strategies and implementing plans for new products.

### Who are we looking for?

- To be successful in this role you will need a Bachelor's/Master's degree in, for example Horticulture, Chemistry or Life Science;
- Experience with registration of agro-chemicals, crop protection products or biocides;
- A good knowledge of (environmental) toxicology;
- A good ability to assess risks and formulate risk management strategies;
- Outstanding written and oral communication skills in English and Dutch, with the ability to influence others and negotiate successful outcomes; Spanish would be a preferred third language;
- You're able to manage and prioritize multiple time-constrained tasks, will follow issues through to conclusions and work independently while remaining a team player.
