

## Product sheet – Chrysal Orchid Food Drops

Chrysal Orchid Food Drops prevents overfeeding. The Food Drops encourage the care process in an easier effective manner, resulting in increased consumer satisfaction.

### General

- Chrysal Orchid Food Drops provide essential minerals (Nitrogen (N), Phosphorus (P) and Potassium (K)), which are easily and rapidly absorbed by plants.
- The formula is based upon research conducted at the Weihenstephan Institute in Germany.
- Convenient product, easy to use and easy to dose.
- Available in blister pack containing 6 Food Drops, sufficient for 12 months plant care.

### Effects

- Maintains the quality of the orchids.
- Contains the necessary amount of trace elements.
- No risk of overdosing.
- Dissolves clearly and without odour in water.

### Applications

- Suitable for all orchids.
- The blister pack can be easily attached to a plant stick.
- Offers additional marketing opportunities.
- The reverse of the pack gives the consumer the opportunity to mark the month of feeding.
- The blister pack is re-sealable so the remaining Food Drops can be easily stored for future use.

### Recommendations

- Store at a temperature between 41°F and 104°F/ 5°C and 40°C.
- Shelf life: 36 months when stored under the right conditions.
- Dosage: 1 Food Drop per litre of water. Orchids can be watered as usual.
- The recommended usage is 1 Food Drop every 2 months.
- Residual solutions may be drained into the sewer system.
